Form It Right

Make your job easier by employing the latest in forming technology.

Secure Outrigger Platform

The fully assembled Outrigger Platform reduces jobsite labor expense and enhances safety. Positioned outside the building's edge, this lightweight platform supports loads up to 4000 lbs. on a heavy-duty, diamond-deck-steel floor. Easily gain access to material via crane or smoothly roll material off the platform, which is flush with the concrete floor. Designed in full accordance with OSHA standards, the unit includes snag-free side

walls and proper rigging to ensure safe flying operations. Quickly and securely mount the Outrigger Platform to the building with post shores or optional through-bolting. Titan Formwork Systems LLC. 480-305-1900. www.titanformwork.com.

Long-Lasting Form Overlay

Barrier Film premium polymeric overlay applied to dense hardwood-faced plywood and Douglas Fir inner plys creates long-lasting forms that are lower in cost per pour. For use with abrasive, high heat, and high-alkaline concrete mixes, the product minimizes wood grain transfer and eliminates patch transfer, while the product's white coloring reflects heat for a controlled pour. Use with the company's table, gang, and engineered systems. Available in 2x8- and 4x8-ft. panel sizes and 1/2-, 5/8-, 3/4- and 1 1/8-in. thicknesses. Non-standard thicknesses, widths, and lengths available when volume requirements are met. Olympic Panel Products. 800-782-7265. www.olypanel.com.

Rapid Set

CONSTRUCTION CEMENT

**FASTER
 STRONGER
 MORE DURABLE**

3000-psi in 1-hour

ADVANCED TECHNOLOGY

- Lower Shrinkage
- Higher sulfate Resistance
- Better Freeze-Thaw
- Lower Permeability
- Higher Bond Strength
- Green Technology
- Longer Life Expectancy

Bag Products

Bulk Cement

SPECIFIED NATIONWIDE AT
rapidset.com

Also Available

**Shrinkage Compensating
 Concrete Technology**

For use with portland cement concrete

IDEAL FOR TANKS, FLOORS
